Develop The Web Application Using Node-RED

Aim: Develop the web application using Node-RED Steps Followed:

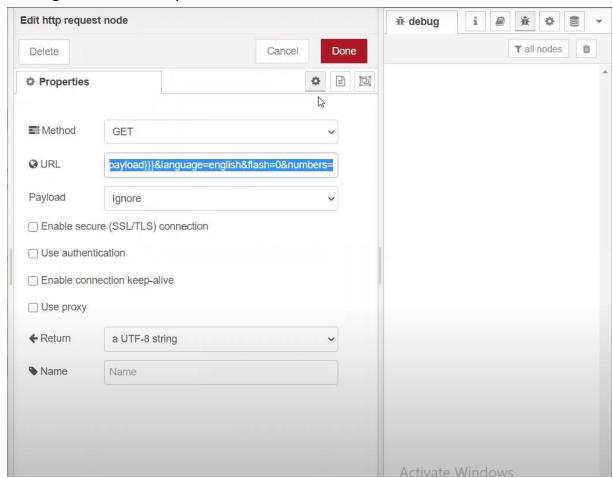

• Opened a Node-RED project

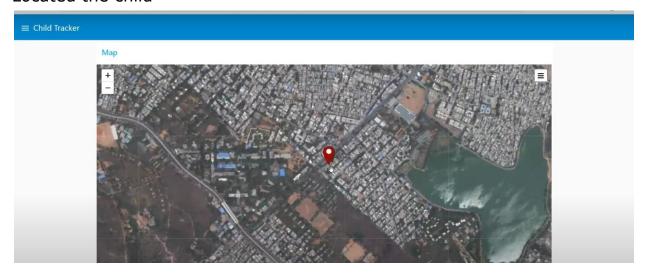

Added code to get child location in python

```
import json
import wiotp.sdk.device
import time
myConfig = {
    "identity": {
    "orgid": "hj5fmy",
    "typeId": "NodeMCU",
        "deviceId": "12345"
    "auth": {
         "token": "12345678"
client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()
While True:
        name= "Smartbridge"
        #in area location
        latitude= 17.4225176
        longitude= 78.5458842
        #out area location
        #latitude= 17.4219272
        #longitude= 78.5488783
        myData={'name': name, 'lat':latitude,'lon':longitude}
        client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPublish=None)
        print("Data published to IBM IoT platfrom: ",myData) time.sleep(5)
client.disconnect()
```

• Editing the HTTP Request URL

• Located the child

Python script sending requests to IBM Cloud

```
₽ × IPython console
                                                                                                      Console 2/A 
Data published to IBM IoT platfrom:
child.py 🖸
1 import ison
                                                                                                       Data published to IBM IoT platfrom:
